CURRENT SITUATION

Regional Update

- On March 24, the U.N. World Food Program (WFP) announced that a food crisis following the December 26 tsunami had been averted.

Earthquake in Indian Ocean

- On March 28, a magnitude 8.7 quake hit near the island of Nias 200 km off the Sumatran mainland, triggering tsunami alerts around the Indian Ocean. According to the Indonesian national disaster agency, 394 people have been killed as a result of the earthquake. The latest U.N. estimates indicate that 626 people are confirmed dead and thousands more are injured in the affected islands. A USAID/OFDA Program Officer reported from Nias on March 29 that the quake destroyed or seriously damaged approximately 40 percent of the concrete buildings in the main town of Gunung Sitoli. According to local media reports, the earthquake damaged or destroyed as many as 80 percent of the buildings on the islands of Nias and Simeuleu. In addition, thousands of people fled their homes in Indonesia, Malaysia, Thailand, India, and Sri Lanka following tsunami warnings. Three hours after the quake, tsunami alerts were scaled down.

Indonesia Update

- On March 17, the Government of Indonesia (GOI) released a statement that the GOI will extend the transition period for reconstruction past March 26 for an additional 30 to 60 days, enabling foreign aid workers to apply for visa extensions and continue humanitarian assistance in Aceh.
- According to OCHA, the U.N. Children's Fund (UNICEF) has reported an increasing number of malaria cases, most likely due to improved and increased testing for malaria. The Provincial Health Office, U.N. World Health Organization (WHO) and UNICEF are working together to expand malaria control activities.

¹ President Bush's supplemental budget request to Congress was for \$950 million.

² The value of assistance provided by the U.S. Department of Defense is not included in this figure.

- On March 23, the U.N. Joint Logistics Center (UNJLC) reported that according to the GOI, 90 percent of the temporary repairs to the Banda Aceh-Meulaboh land route had been completed. In addition, the roads from Banda Aceh to Lamno and Lamno to Teunom have been reopened.
- On March 26, the GOI presented the draft Master Plan for reconstruction of tsunami-affected areas to local governments and the public for comment.

Sri Lanka Update

- According to OCHA, non-governmental organizations (NGOs) have reported that bodies are still being discovered in the Hikkaduwa area. The American Red Cross has provided additional body bags at the request of the Galle District authorities.
- A new radio station, Sayura FM, has been established in Hambantota District to reach tsunami-affected communities.
- The Government of Sri Lanka's (GOSL) Transitional Accommodation Project (TAP) announced the near completion of 10,000 transitional housing units in 10 affected districts. Four thousand transitional housing units have already been completed, and another 20,000 transitional housing units are slated for completion in the coming months.
- According to the USAID/Disaster Assistance Response Team (DART), local media reported on March 27 that the Urban Development Authority (UDA) has signed 100 Memoranda of Understanding with donors to build 30,000 houses for tsunami victims who were living within the 100 meter buffer zone. Construction of houses is now in various stages across the affected areas. The UDA is only building houses for victims who were living in the buffer zone. The GOSL will provide financial assistance to others to reconstruct houses on their own lands. Each single story housing unit will be 500 square feet, and approximately 60,000 units will be built, according to the UDA Deputy Director.

India Update

- USAID/India reports that the Tamil Nadu and Kerala state governments have introduced guidelines for reconstruction of houses affected by the tsunami in those states.
- According to the Administration of the Andaman and Nicobar Islands, land has been cleared in order to prepare 57 planned sites for 10,245 temporary shelters in the islands.
- The USAID/OFDA South Asia Regional Advisor reports that generally programs are advancing on target, although concerns about appropriate permanent shelter solutions continue to hinder recovery efforts. In Kanyakumari District, NGOs have reported a scarcity of potable water at some temporary shelter sites but are working with local leaders to address the problem. In addition, cash-for-work activities are in high demand among disaster-affected populations. Local populations have also expressed a strong desire for permanent shelter and fishing equipment.

Maldives Update

- The World Bank has approved \$14 million for the "Maldives Post-Tsunami Emergency Relief and Reconstruction Project." The project will assist the government's efforts to provide social services, restore livelihoods, and build the capacity to implement the reconstruction and rehabilitation program.
- OCHA reports that the humanitarian community has agreed upon a three-tier approach to psychological and social support services. At the primary level, the American Red Cross and the Ministry of Gender will train community members and teachers in all the atolls. At the secondary level, the U.N. Population Fund (UNFPA) will conduct a more focused training for the managers of the IDP camps, community leaders, the media and health care workers. At the central level, WHO will provide technical and clinical training and referral services.

Somalia Update

- During the March 8 visit of the inter-agency assessment team to Puntland Region, OCHA appealed to the authorities to take a more proactive role in the coordination of humanitarian operations. Officials responded by establishing the Humanitarian Affairs and Disaster Management Agency (HADMA), which met for the first time on March 22. The next meeting will be held on April 5 with future meetings to be held on a monthly basis.
- According to OCHA, the main operational challenge remains access to towns and settlements on the coastal area.

USG ASSISTANCE

USAID Regional Response

- As the transition from relief to reconstruction continues, USAID/DART members remain in tsunami-affected countries. USAID/DART members are focused on monitoring USAID/OFDA's current programs, coordinating with other donors, and transitioning activities to USAID Missions. An additional \$20 million in International Disaster and Famine Assistance (IDFA) funding is being used by USAID/ANE to launch rehabilitation and reconstruction programs.

Indonesia

- To date, the USG has provided more than \$41.1million in emergency food assistance, relief supplies, shelter, water and sanitation, health, livelihoods recovery, psychological and social support, logistics and coordination, and rehabilitation activities for affected communities in Indonesia. On March 9, USAID/OFDA provided more than \$940,000 to the International Rescue Committee for rapid impact livelihoods activities in Aceh Province.

- On March 29, in accordance with a disaster declaration and request for assistance from U.S. Ambassador to Indonesia B. Lynn Pascoe, USAID/OFDA provided an immediate contribution of \$50,000 each to CARE and Save the Children to respond to the March 28 earthquake on the islands of Nias and Simeuleu.
- USAID/ANE-funded reconstruction efforts have been initiated in Banda Aceh. To date, USAID/ANE has provided more than \$10 million to support programs including small infrastructure activities, equipment and capacity building for local governments and communities, and assessments for road reconstruction.

Sri Lanka

- To date, the USG has provided nearly \$61.0 million in emergency food assistance, relief supplies, shelter, water and sanitation, health, livelihoods recovery, psychological and social support, protection and anti-trafficking, logistics and coordination, and cleanup and rehabilitation activities for affected communities in Sri Lanka. USAID/OFDA-funded cash-for-work and micro-finance programs are fully operational. The USAID/DART in Sri Lanka is now focusing on program monitoring and evaluation and ongoing situational assessments.

India

- On January 31, the USAID/DART in India closed out after more than four weeks of operations, providing approximately \$4.1 million for shelter, water and sanitation, cleanup and rehabilitation, education, and cash-for-work activities for tsunami-affected residents. During the transition to the recovery phase, USAID/India will oversee USAID/OFDA-funded programs; USAID/OFDA and USAID/India will share responsibility for monitoring.

Department of Defense (DOD) Humanitarian Assistance

- As of February 14, Combined Support Force 536 ceased operations in the tsunami-affected countries. During the response, U.S. military personnel delivered more than 24.5 million pounds of relief supplies and equipment to the region. The U.S. military has delivered a total of 9,487,681 pounds of relief supplies to the governments of Indonesia, Sri Lanka, Thailand, and other affected nations.
- On March 16, the USNS Mercy hospital ship departed Banda Aceh, concluding six weeks of medical assistance. The USNS Mercy conducted a wide range of medical and dental assistance programs ashore and afloat, performing 19,512 medical procedures, including 285 surgical and operating room cases. In addition, the U.S. Navy's Environmental Preventive Medicine Unit Six tested water in tsunami-stricken areas, coordinated the delivery of drinking water to contaminated areas, and helped to control mosquitoes and other insects. The USNS Mercy is now being returning to Nias to assist with medical needs arising from the March 28 earthquake.

BACKGROUND

- A magnitude 9.0 earthquake on December 26, off the west coast of Northern Sumatra, Indonesia, triggered massive tsunamis that affected several countries throughout South and Southeast Asia, as well as Somalia, Tanzania, Kenya, and the Seychelles in East Africa. Aftershocks from the December 26 earthquake continue to occur in the region.
- Based on initial findings of USG assessment teams and on the recommendation of Secretary of State Colin Powell and USAID Administrator Andrew Natsios, on December 31, President George W. Bush committed \$350 million toward earthquake and tsunami relief and recovery efforts. Dollar amounts in this Fact Sheet are part of the total pledge of \$350 million and refer to specific funding actions that have been committed and programmed.
- On February 9, President Bush announced that he is seeking \$950 million as part of the supplemental appropriations request to support the rehabilitation and reconstruction of areas devastated by the Indian Ocean tsunami and to cover the costs of relief efforts to date. This amount includes an additional \$600 million above the President's initial commitment of \$350 million. Congressional action on the supplemental request is expected in April.

GUIDANCE FOR PROPOSAL SUBMISSION TO USAID/ANE BUREAU:

USAID assistance in response to the earthquake and tsunami disaster has moved from the relief phase to reconstruction. The Indonesia USAID Mission has now issued an Annual Program Statement (APS), which can be found on www.usaid.gov on the tsunami page under grants. Additional calls for proposals for the reconstruction phase may be released in the future. Please continue to consult www.usaid.gov or www.fedgrants.gov for updates.

The number for the ANE Reconstruction Management Team of USAID is 202-712-0182.

The e-mail for the ANE Reconstruction Management Team is ANE.tsunami@usaid.gov

FURTHER INFORMATION ON USG RESPONSE

More detailed information on USG assistance already provided, including DOD resources, in response to the disaster may be found in previous USAID/OFDA Fact Sheets:

http://www.usaid.gov/our_work/humanitarian_assistance/disaster_assistance/countries/indian_ocean/et_index.html

PUBLIC DONATION INFORMATION*Making a Donation to Relief Efforts*

- The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations.
- For a list of humanitarian organizations accepting donations for South Asia relief operations, please see “Tsunami Relief” at www.usaid.gov or www.usafreedomcorps.gov. Or call the Center for International Disaster Information at (703) 276-1914.
- USAID encourages cash donations because they allow aid professionals to procure the exact items needed (often in the affected region); reduce the burden on scarce resources (such as transportation routes, staff time, warehouse space, etc); can be transferred very quickly and without transportation costs; support the economy of the disaster-stricken region; and ensure culturally, dietary, and environmentally appropriate assistance.

Additional Information

- Information on making effective donations can be found on the following websites:
 - USAID: www.usaid.gov, Keyword: Donations
 - The Center for International Disaster Information: www.cidi.org
 - InterAction: “Guide to Appropriate Giving” at www.interaction.org
- Information on choosing a charity to support can be found on the following websites:
 - Better Business Bureau: www.give.org
 - GuideStar (A National Database of Nonprofit Organizations): www.guidestar.org
